EDUCATION

B.S. Computer Science

Laguna State Polytechnic University
2023 - Present

DOST-SEI Undergraduate Scholar

TECHNICAL SKILLS

Machine Learning / AI

PyTorch • TensorFlow • Scikit-learn • XGBoost •
Decision Trees • Ensemble Models

Computer Vision

YOLO • OpenCV • ByteTrack • CVAT

Data & Forecasting

Pandas • NumPy • time-series • spatio-temporal
forecasting • Regressions

Development

Python • JavaScript • C# • SQL • Flask • React

Data / Tools

MySQL • MariaDB • SQLite • Git • GitHub •
SUMO • Linux

DOST AFFILIATIONS

• DOST-SEI Undergraduate Scholar

• Regional Representative - START-DOST |
2026

• Finance Committee - LSPU SCC DOST
Scholars' Guild | AY 2025-2026

LANGUAGES

Filipino - Native
English - Professional

CORE STRENGTHS

- Research-oriented development
- Technical problem solving
- Project leadership
- Team collaboration
- Communication
- Data-driven system design

PROFESSIONAL PROFILE

Fourth-year B.S. Computer Science student and DOST-SEI Scholar with hands-on experience in machine learning, computer vision, forecasting, data processing, and full-stack software development. Builds end-to-end systems from data preparation and model training through inference, APIs, databases, visualization, simulation, and deployment. Also experienced in research-oriented development, project leadership, and multidisciplinary technical work.

LATEST TECHNICAL PROJECTS

Easy-Flow - Intelligent Traffic Monitoring and Management System

Undergraduate Thesis / Research & Development Project | 2026 - Present

- Developed a real-time CCTV analytics pipeline using YOLOv8, ByteTrack, and OpenCV for vehicle detection, tracking, traffic flow, speed, and density measurement.
- Implemented a PyTorch AGCRN spatio-temporal model for multi-horizon traffic forecasting across four intersection approaches.
- Designed violation-detection logic, adaptive traffic-light timing, SQL data aggregation, and SUMO-based intersection simulation.
- Integrated Flask APIs, MySQL/MariaDB, React/Tailwind dashboards, and a gateway for live municipal CCTV feeds.

AgriWise - Agricultural Market Intelligence Platform

Hack4AProgress 2026 CALABARZON | Team Project | 2026

- Developed demand-forecasting workflows using PSA FIES/LFS and agricultural supply-utilization data, with XGBoost and statistical benchmarking/disaggregation methods.
- Worked on quarterly and geographic demand estimation, synthetic municipality-level simulation, supply-gap analysis, and farmer-oriented market intelligence.
- Contributed to GIS opportunity mapping, market advisory concepts, and an AI/RAG agriculture-extension assistant.

ACHIEVEMENTS & RECOGNITION

- Winner - Hack4AProgress 2026 CALABARZON (AgriWise).
- Selected Regional Representative - START-DOST, 2026.
- DOST-SEI Undergraduate Scholarship recipient.

DOST PROGRAMS, TRAINING & CERTIFICATES

- DOST CALABARZON Scholars' Leadership Camp - Participant.
- YUGTO 2024 - DOST Regional Patriot Council CALABARZON - Participant.
- LSPU Tugatog Leadership Training and Workshop 2.0 - Participant, Oct. 29, 2025.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

President - Student Organization of the College of Computer Studies (SOCCS)

LSPU Santa Cruz Campus | AY 2024 - 2025

- Led organization operations, coordinated officers, and supported college-wide student programs and events.
- Represented student concerns and helped coordinate communication among students, officers, and college stakeholders.

3rd Year Representative - Computer Science Society

LSPU Santa Cruz Campus | AY 2025 - 2026

- Represented Computer Science students and supported academic, organizational, and student-related initiatives.

Finance Committee - DOST Scholars' Guild

LSPU Santa Cruz Campus | AY 2025 - 2026

- Assisted with budgeting, financial coordination, and documentation for scholar-led activities and programs.

ADDITIONAL DEVELOPMENT EXPERIENCE

Backend Developer - Academic Web Application

LSPU College of Computer Studies | 2024 - 2025

- Implemented backend application logic, data handling, and SQLite database operations.

Lead Developer - Library Management System

LSPU College of Computer Studies | 2023 - 2024

- Developed a full-stack desktop records-management system using C# and Windows Forms.

TECHNICAL INTERESTS

Applied machine learning • computer vision • spatio-temporal forecasting • intelligent public-sector systems • agricultural market intelligence • simulation • practical AI deployment
